

CROWDFUNDING DAPP

A Decentralized Crowdfunding Platform Built on Ethereum Blockchain

MCA 3rd Sem Mini Project

Submitted By

Girdhar Agrawal, Sudhanshu Sharma, Aditya Yadav

Introduction & Problem Statement

Problem Statement

- ▶ Traditional crowdfunding platforms charge high fees (5-10%)
- ▶ Lack of transparency in fund utilization
- ▶ Centralized control over funds
- ▶ Geographical restrictions on donations
- ▶ Risk of fraud and misuse of funds

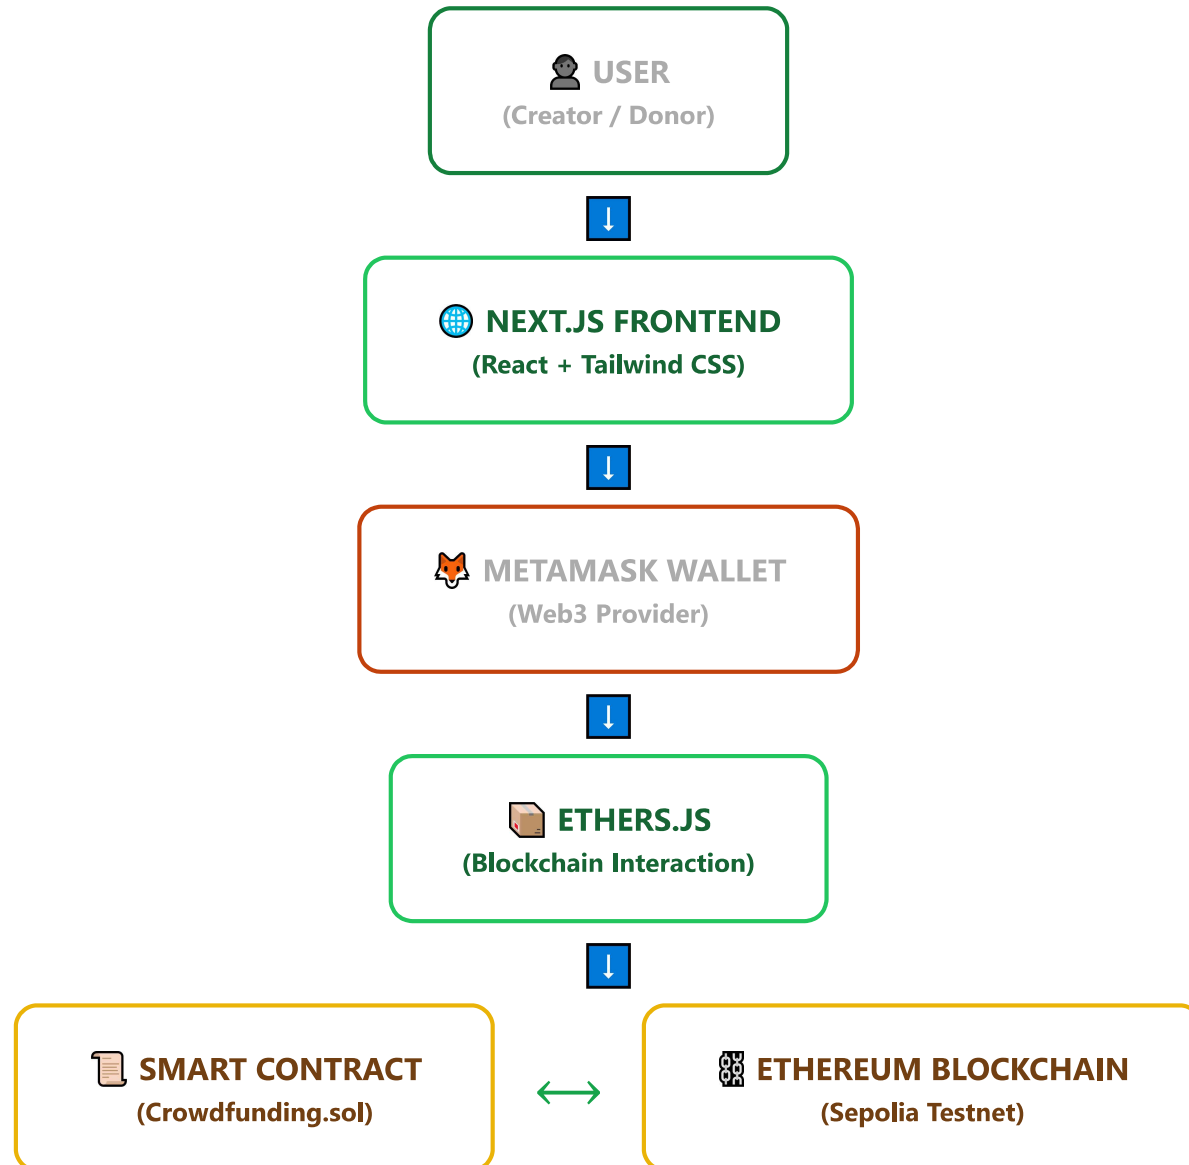

Our Solution

- ▶ Decentralized platform with no intermediaries
- ▶ Complete transparency via blockchain
- ▶ Smart contracts ensure trustless transactions
- ▶ Global access with cryptocurrency
- ▶ Automated refunds if goals aren't met

System Architecture & Flow Diagram

Key Features

Create Campaigns

Create fundraising campaigns with title, description, goal & deadline

Donate with ETH

Donate to campaigns using Ethereum cryptocurrency securely

Update Campaigns

Edit campaign details before receiving any donations

Automatic Refunds

If goal not met by deadline, donors can claim automatic refunds

Creator Dashboard

Campaign owners can track donations and withdraw successful funds

Donor Tracking

View all donors and their contribution amounts transparently

Technology Stack

Category	Technology	Purpose
Frontend	Next.js 15, React 19	Modern web application framework with SSR
Styling	Tailwind CSS 4	Utility-first CSS for responsive design
Smart Contract	Solidity ^0.8.28	Ethereum smart contract programming
Blockchain	Ethereum (Sepolia)	Decentralized network for transactions
Web3 Library	Ethers.js 6	Interact with Ethereum blockchain
Development	Hardhat	Smart contract testing & deployment
State Management	Redux Toolkit	Centralized state management
Database	Prisma + PostgreSQL	Off-chain data storage
Wallet	MetaMask	Browser wallet for transactions

Future Scope

- ▶ **Multi-chain Support:** Deploy on Polygon, BSC, and other EVM chains for lower fees
- ▶ **NFT Rewards:** Issue NFT certificates to donors as proof of contribution
- ▶ **Milestone Funding:** Release funds in phases based on project milestones
- ▶ **DAO Governance:** Community voting on featured campaigns
- ▶ **Mobile App:** Native iOS/Android application with wallet integration

Thank You!
